Kitaneh Fitzpatrick marked it as to-read May 08, Its not ideal—but its a start.

Theywarnyouupfront,itwillgetalittledense. It is always better to let elites manage things, as a sufficiently educated mind can grasp all the essentials of the economy and direct resources in the very best way. Of course the biggest issue with wind and solar is that they are intermittent. Nawar Alsaadi rated it liked it Dec 18,

Afterall,algaewasthesourcematierialforthe petroleumweareusingtoday—see no doom scenarios ahead. Finally, "The Impending World Energy Mess" provides a balanced discussion of the strengths and weaknesses of a number of electric power production technologies, and in particular, the inherent weaknesses in solar and renewable technologies.
