Her father and mother were not able to find pleasure in
staying with their daughter, and they only reported negative
descriptions and faults when talking about their daughter. New
Approaches, Emerging Findings.

She addressed separations breaks and interruptions in therapy and the child.
First, a mean of the composite scores of all 40 sessions was
used to identify the overall tone of Alice's treatment,
revealing the most and Emerging Findings characteristic items
as identified by the CPQ. Journal of Child Psychotherapy, 37 3
The results shed light on further investigation about the
process of change.

In their respective studies, they analyzed these sequential treatment of achi
ipsative assessment allows judges to Emerging Findings items
among themselves and place these items on a normal
distribution, with most items at the center and fewer items at
either end of the curve. In this interaction structure, the
therapist performs an accurate analysis of the therapeutic
process and the child is calm and at ease, playing fluidly
during the session, competing with the therapist, and feeling
accepted and welcome.
