Would We Know Alien Life If We Saw It? | Space | Air & Space Magazine

The discovery of many potentially habitable planets beyond the solar system and a growing understanding of the variety of life on Earth.

The Guardian view on alien life: what if it's not there? | Editorial | Opinion | The Guardian

We do not yet know whether there are any other instances of life in the Universe besides what we've found here on Earth. Although scientists.

Extraterrestrial life - Wikipedia

In this talk, I would like to speculate a little, on the development of life in the universe, and in particular, the development of intelligent life. I shall take this to.

"Defining life is a problem," explains Carol Cleland, a University of Colorado . . . in the universe are either unique or universal: Two is an impossible number.

Editorial: The universe is so big and full of stars that it seems obvious some must have evolved intelligent life. But it turns out we know so little.
