Traditionally, these phenomena have been attributed to disparate causes. Such innovations were followed by a wave of extinctions beginning with large mammals and land birds. Karner DBet al.

The present frenzy over international warming has galvanized the general public. Dust trapped in wetlands comes largely from terrestrial sources, but, by extension, cosmic dust is probably trapped in these environments as well. Chance occurrences of impacts and extinctions can be rejected at a high confidence level. General geological setting and stratigraphy. Various different start dates for the Anthropocene have been proposed, ranging from the beginning of the Agricultural Revolution 12,000-15,000 years ago, to as recent as the Trinity test in
