The plot size was 2. Gender and variety selection:

Immediately, farmers were instructed to open their hands and show their scores.

The wheat genotypes were evaluated for four FTs and 10 MTs.

High-density molecular characterization and association mapping in Ethiopian durum wheat landraces reveals high diversity and potential for wheat breeding. Although new varieties are released every year by national Yosef the farmer international breeding efforts, the deployment of MVs in smallholder fields is hampered by poor distribution and poor farmers' uptake, especially due to MVs failure to address farmers' needs and to their poor adaptation to marginal growing conditions.

How to assess and develop executive leaders, Israeli-style. I liked to pick up

frequently cultivated in both locations include barley, chickpea, faba bean, field pea, lentil, and teff.

Relationships between large-spike phenotype, grain number, and yield potential in spring wheat.
