His research covered a broad range of topics and he was one of the first to work on desiccation tolerance of bryophytes under elevated CO<sub>2</sub>. Bringing together research from a diverse range of ecosystems, from desert to Bryophyte Ecology and Climate Change, aquatic to alpine, this book explores how bryophytes can be used to monitor the effects of climate change on the living environment and in computer modeling of future changes. Thank you for your feedback which will help us improve our service.

Lloyd is currently an Associate Professor in the School of Life Sciences at the Edinburgh Journal of Botany. The Edinburgh Journal of Botany is an international journal of plant systematics covering related aspects of biodiversity, ...
